DETAILED ACTION

Election/Restrictions

1. Applicant's affirmation of the election with traverse of species Ib and IIb in Paper No. 4 is acknowledged. The traversal is on the ground(s) that the generic claim is allowable. This is not found persuasive because the generic claim is still not allowable (see below).

The requirement is still deemed proper and is therefore made FINAL.

2. This application contains claims 17, 21-23, 32 and 33 drawn to inventions nonelected with traverse. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 16, 18-20 and 24-31 are rejected under 35 U.S.C. 112, first paragraph, for reasons cited in the previous action.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 16, 18-20 and 24-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
7. The newly amended claims recite "a branched polymeric base-catalyzed reaction product consisting essentially of A) at least on epihalohydrin or trihaloalkane and B) at least one alkoxyated alcohol". These claims do not set forth the subject matter which applicant(s) regard as their invention based on the originally filed disclosure, which defines the "a branched polymeric base-catalyzed reaction product" as being the product of "A" and "B" and not "A" and "B" themselves, as in the present claims.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
9. Claims 16, 18-20 and 24-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kato et al. in combination with Nakamura et al., for reasons cited in the previous action.

Response to Arguments

10. Applicant's arguments filed 4/30/03 have been fully considered but they are not persuasive.

11. Contrary to applicant's argument, the present claims are not product-by process claims. The claims are not even to methods of using a product of a process. What **recited** product is being prepared by what **recited** process (must have steps)?

With regard to the "reaction product", the present claims are to method of using a product. The problem is that we don't know what exactly is the product being used. While applicant's disclosure may contain multiple representative examples. These examples, and steps contained therein, cannot be read into the claims as limitations. The field of possible products as is still not fully supported, even though the present claims are inconsistent with the original invention.

12. Regarding the 103 rejections, the reaction product of Nakamura et al., used in combination with Kato et al., is still a reaction product of "A" and "B".

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
